

Forever Friends – Enhancing the Horse-Human Relationship

Have you and your horse hit a "bump" in the road? Does it seem the communication lines between you and your horse are blocked or broken? Are you feeling like there is something you are missing? Is something preventing you from taking your partnership to the next level?

The *Forever Friends* workshop is designed for anyone who wants to build a true relationship with the horse in their life. I am not offering "quick fix" tricks or gadgets to temporarily stop a "bad horse" behavior. Rather, I am offering to assist you in opening the lines of communication with your horse. Together we will

decipher what your horse is trying to tell you and I will give you the tools so that you can work through it together with the goal of a more defined unity of mind and spirit resulting in deeper relationship with your equine partner.

This clinic is for participants and horses of all levels. Participants may ride their horses or work from the ground; it depends on what your goals are for our time together. Using a holistic (whole horse) approach, I will utilize my skills in horse communication and behavior analysis to help you find the answers you are looking for. This clinic is for anyone who wants to enhance their partnership with their horse; the horse need not exhibit a behavioral problem for you to benefit from this clinic.

I am looking for facilities interested in hosting this clinic! The clinic format allows for eight to ten, 45-60 minute time slots each day. Multiple day clinics are available as are clinics for fewer participants. Please email Cheryl at info4peacehorse@gmail.com to request an (electronic) information packet for hosting the Forever Friends clinic. Please specify if you prefer Microsoft Word or PDF format.
